[CAUTION: Non-UBC Email]
Dear Professor Flood,

My thanks to you and the other signatories for your letter dated November 11, 2020 and for sharing your perspectives, which I have considered carefully.

I have a different perspective about the review that will be undertaken by Prof. Patterson and I believe that it will be thorough, fair, evidence-based and independent. A central purpose of Professor Patterson's report will be to establish the facts in the case, which currently do not benefit from a shared understanding. The reviewer will be able to provide a comprehensive factual narrative of events and determine whether University policies were followed in the search. I will assess the reviewer's report carefully. Because the report will be made public, there will be transparency. I think it is important not to prejudge outcomes and to let the review proceed in its present form.

Sincerely,

Meric Gertler
President
University of Toronto
